Information Literacy
Develop information literacy programs that contribute to academic success and lifelong learning.

Collections
Expand collections, particularly in electronic formats, to meet the needs of students and faculty.

Research Services & the QEP
Support the university’s QEP, R.E.A.L. Inquiry, which uses the development of research skills and the practice of research as a vehicle for improving students’ critical thinking, information literacy, and communication skills.

Space
Enhance physical and virtual spaces to ensure a range of environments that are conducive to learning, teaching, collaboration, and solitary work.

Digital Commons
Promote and make accessible faculty and student research/creative work in the university's digital repository.

Technology
Offer the most up-to-date technology hardware and software to meet user needs.
